DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group III (claims 18-19) in the reply filed on 4/2/2009 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 18-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 18-19, Applicant has not supplied a unit for which the temperature for the theoretical burning temperature is to be measured with. It appears that Applicant intends these temperatures to be measured in Celsius ($^{\circ}\text{C}$) and the claims will be treated as such for the purposes of this action. Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shinichiro et al. (JP 57-123824, cited in IDS).

As to claim 18, Shinichiro is directed to a method for manufacturing a titanium dioxide particle by flame-hydrolyzing titanium tetrachloride in a hydrogen burning flame, wherein the theoretical burning temperature of the flame is set within the range from 600-1200° C (abstract).

In the case where the claimed ranges "overlap or lie inside ranges disclosed by the prior art" a prima facie case of obviousness exists (see MPEP § 2144.05 and *In re Wertheim*).

Further, it is the Examiner's position that the temperatures taught by Shinichiro require the theoretical burning temperature of the flame to be set within the range disclosed in the instant claims.

Regarding claim 19, the reference teaches the theoretical burning temperature of the flame is set within the range from 600-1200° C (abstract).

In the case where the claimed ranges "overlap or lie inside ranges disclosed by the prior art" a prima facie case of obviousness exists (see MPEP § 2144.05 and *In re Wertheim*).

Further, it is the Examiner's position that the temperatures taught by Shinichiro require the theoretical burning temperature of the flame to be set within the range disclosed in the instant claims.
